

The **Provider Audit™** is an easy-to-use solution to **assess risks** and provides a **rapid audit** of the reasonableness and fair market value risks of individual and large groups of physicians.

The tool assists in ranking arrangements by risk level.

Low – There is low Fair Market Value Risk, but the physician may need updates to their compensation.

Moderate – This is what is expected for the Market and there is low risk.

Above Market Value Range – The result indicates there could be Fair Market Value risk associated with this provider.

The tool was developed with General Counsel and Compliance Officers in mind. The user can do a quick check on provider compensation and receive overall results or a summary report on each provider.
